Bhavya Aluminium Furniture is Synonym with Widows & Doors for over 17 years. We are one of the leading manufacturer of apt. solutions for fenestration in Western India and have become a trusted name in industry. We have wide range of style options to suit every home and every form, from sliding windows to casement windows, we provide a fastidious approach, something from the repertoire or develop a new product for each and every price range.

Welcome to the **World of Aluminium Windows - WAW** where you will get quality products combined with premium service, reliability and compliance. A place where our target is providing dependable solution and follow through and not just selling a product. A place where Feedback is matters more than the pitch. A customer is always right. A place where quality is placed above profit. This assiduous approach is not new, It continues since inception, since the day the company is engaged in manufacturing aluminium Windows & Doors to be used in residential and commercial places. Today Bhavya Aluminium is the "go-to source" for the best and the finest Aluminum Windows & Doors.

We strive to give the best quality treatment combined with meticulous craftsmanship for every window and door that comes out of Bhavya.

The Product

Sliding Window / 04

Sliding Window

Aluminium sliding windows are a popular choice for quick and effective ventilation. They are useful in areas with limited space that cannot accommodate Casement window sash protruding inside or out. Horizontal slider window opens with the sash sliding left or right. It is an ideal choice for rooms facing walkways, porches or patios.

At Bhavya,
We add a **expert component** "Anti- Lift block" while crafting of the sash, we incorporate many state of the art components that we have developed owing to the years of experience and feedback.

all Bhavya windows :
» Anti- Lift block - prevents manipulation & increases security.

- » Anti Dust Blocks - to reduce the penetration of dust in your home through window track.
- » EPDM Gasket - for Air and Water resistance.
- » Silicon Coated Wool Pile - Increases the life.
- » Double glass (DGU) - be considered for better sound and heat insulation.
- » 'One Way Only' weather flaps (*fitted in all WAW sliding windows*)- Reduce air & water penetration, covers drain slots & minimize insect intrusion.

We use finest quality of hardware sourced from different corner of the world.

Available in vast range of options of Powder Coating, Anodizing and Wooden finish coating for Windows to create best aesthetic combination with surrounding interior/exterior design.

SL-25

An ideal solution for apartment flats and commercial building offering impressive and functional results.

Shutter Size	25 mm x 63 mm
2 Track	65 mm x 42.5 mm
3 Track	101 mm x 42.5 mm
Window Height	Max. 1800 mm
Sash Weight	Max. 70 Kgs
Hardware	Single / Multipoint Locking
Joinery Detail	45° with corner connector
Glazing Options	Single
Glazing Thickness	5 mm / 6 mm
Mosq. Mesh	Tear resistant Fibre Mesh
Finish	Powder coating (Satin / Textured finish) Wood effect powder coating

This system is resistant to air, water and wind pressure with High Performance Accessories.

SL-29

An ideal solution for residential bungalow, villa and apartment flats offering impressive and functional results.

Shutter Size	29 mm x 65 mm
2 Track	64 mm x 50 mm
3 Track	100 mm x 50 mm
4 Track W/O. Leg	122 mm x 48 mm
Window Height	2400 mm
Sash Weight	120 Kgs
Hardware	Single / Multipoint Locking
Joinery Detail	45° with corner connector
Glazing Options	Single / Laminated / DGU
Glazing Thickness	Min. 5 mm Max. 20 mm
Mosq. Mesh	Tear resistant Fibre Mesh
Finish	Powder coating (Satin / Textured finish) Wood effect powder coating

SL-34

SL-34 has been exclusively designed for comfortable interiors and visual aesthetics. It is multi-functional range that can be used for diverse spaces with great technique and supreme care. It is the product for better tomorrow.

Shutter Size	34 mm x 74 mm
2 Track	80 mm x 45 mm

Glazing Options	Single / Laminated / DGU / DGU With Integrated Blinds
Glazing Thickness	Min. 12 mm Max. 44 mm
Mosq. Mesh	Retractable
Finish	Powder coating (Satin / Textured finish) Wood effect powder coating

Casement Window / 12

Casement Window

Casement Windows are outward opening windows.

Casement windows provide a better air tight seal and better sound insulation as compared to sliding windows. It minimizes leakage in the fenestration & improves temperature regulation from inside out and outside in. In hot and humid regions where temperature rises to a smothering 45°C in summer, it reduces the cooling loss through windows/ doors, helping in standard use of the air conditioner and maintaining the temperature and avoiding overload and repetitive use of cooling systems.

Similarly, in cold, dry climates the casement windows seals shut the warmth inside with little to no leak to the outside environment and vice versa

with the outside weather to the comfort of your room, house.

Use of Double glass (DGU) should be considered to achieve better sound and heat insulation. Bhavya

aluminum provides a vast range of options of Powder Coating and Wooden finish coating for

Windows to create best aesthetic combination with surrounding interior/exterior design with no compromise on function.

At Bhavya, we always use EPDM Gasket for Air and Water tightness with Longer Life, a specially engineered wedge to withstand shutter load up to 75kgs for smooth trouble free operation.

CV-40

CV-40 has been designed for smaller rooms, bathrooms, powder rooms and so on. It is designed taking into consideration the opening available and the quick ventilation needed for smaller rooms.

Casement Door

A door is the first welcome to your home. It also carries the last good byes.

At Bhavya, we know the importance of memories, we always frame things we love and keep it in sight.

Keeping this in mind we have crafted a range of Aluminium Doors, which not only is secure and seamless but will last you as long as the memories.

Whether you are looking for a striking, secure front entry or practical side door, we have a wide range of options that meet any unique requirements, made available in customized sizes & finishes.

Specially designed wedge is clamped along with reversible hinges to withstand shutter load up to

120 kgs for smooth trouble free operations. The bottom of our doors are sealed with a threshold or bottom sweep gasket.

We can engineer swing doors, with an option of using floor springs. Siliconized EPDM gaskets are excellent for air and water tightness. The EPDM gasket also lasts almost 10 times more than other sealants in market.

Double shutter style for swing doors to prevent dust ingress. Wide Range of colors available through Powder coating process and a variety of glazing options available. Concealed fixings for ease of installation.
